SOLIS Flexi Temp Kettle

Type 5519

Boil your water just the way you want it.

Solis

Bright Digital Display

Bright, easy-to-read display for the desired water temperature, current water temperature, operating mode and temperatures and brewing times for different types of tea.

Limescale Filter

The integrated stainless steel limescale filter keeps limescale particles away.

Two Water Level Display

Thanks to the two opposite-facing water level displays, you always heat just the right amount of water.

Silent Mode

Acoustic signals when pushing buttons or at the end of the boiling process can be switched off.

Precisely Right

You need different water temperatures for different uses.

Easy to clean

Large opening for easy cleaning.

Features

+ Saves time! 1 litre of boiling water in approx. 3 minutes.
+ Uses almost half the energy compared with heating the same amount of water in a pan.
+ All plastic parts are BPA-free
+ Keep warm function (Up to 30 minutes)
+ Adjustable temperature from 40°C to 100°C (in increments of 5°C)

Specifications
