- o Simple wall mounting possible
- o Phone book for up to 100 entries incl. VIP function
- o Hearing aid compatible
- o Redial
- o Call signalling with 10 ring tones
- o Suitable for operation with telephone systems

The corded Gigaset DESK 600 with LC display and seven double assignable direct dialling keys is ideal for use at home or in the office.

Large LC display with backlight

The Gigaset DESK 600 has a three-line LC display with LED backlighting that shows the name, call number and VIP status (if assigned) of the caller. It also provides information on call time as well as the date, time and current calendar week.

Hands-free function & headset connection

To keep your hands free even during longer conversations, the Gigaset DESK 600 has a hands-free function with a 7-step adjustable volume. In addition, a headset connection (RJ9) is integrated, which enables the connection of professional headsets.

Seven double-assignable direct dialling keys

With the help of the seven double-assignable direct dial keys, important contacts are only a keystroke away. This allows you to quickly connect with the people you talk to frequently. The direct dialling numbers are noted on the enclosed paper inlay and are thus always in view.

Integrated phone book

The integrated phone book offers space for up to 100 phone numbers: This means that all important contacts are stored directly in the device with their names. Via the VIP status, a contact can be assigned its own VIP melody. In addition, you can set the phone to ring only when VIP contacts call - and to remain silent for all other calls.

Gigaset
