

SOLIS Eco Boil Kettle

Get hot water fast with lower power consumption.

Type 5520

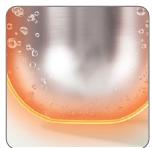

Unique heating design

Thanks to the 3D heating system, the water is heated from both the base and sides. This means that the Eco Boil Kettle uses less energy than traditional kettles.

Reduced noise

Because of the special shape of the water container, small air bubbles form as the water boils, which combine into larger bubbles and make a more pleasant noise, while also reducing it.

Easy to clean

The rounded cornerless bottom makes the kettle simple to clean and hygienic.

Limescale filter

The built-in limescale filter reliably traps particles.

Double-walled construction

No risk of burns on the jug thanks to its double-walled metal construction.

Large opening

The large opening and wide opening lid also ensure effortless cleaning.

Features

- + Max. capacity: 1,7 litres
- + Fill capacity: 0,2 - 1,7 litres
- + The interior is a single, seamless component. No little crevices for dirt or limescale.
- + All plastic parts which come in contact with water are BPA-free

Specifications

Article no.:	96244 (SEV) / 96245 (SCH)
Material:	Stainless Steel + Plastic
Output:	1800 W
Weight:	1.12 kg
Dimensions:	approx. 23 x 16 x 26 cm (W incl. handle x D x H)
EAN Code:	7611210962441 (SEV) 7611210962458 (SCH)

So Swiss, so Solis.
